Overview

- **Onboard surveillance:** IP/ HDCVI/ Analog camera and Mobile NVR/ DVR
- **Data transmission:** 3G/ 4G and Wi-Fi network
- **Control center:** VMS/ Central Storage/ TV wall

SOLUTION DETAIL

Alarm System and Crash Detection System

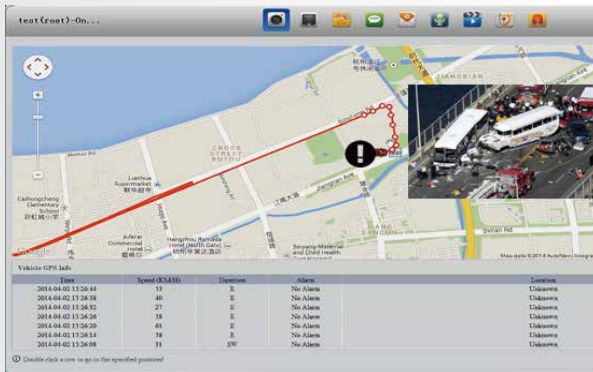

Various alarm detectors connected with mobile DVR help to safeguard passengers and driver against pickpocket, vandalism, robbery and crash accident.

Alarm Report

Control center can be notified through the 3G or 4G network immediately once the onboard incidents happened.

Crash Detection System

Built-in 3 axis G-sensor

Mobile DVR equipped with G-sensor inside is able to detect vehicle collision or crash accident and push an alarm to notify the control center.

Fare Fraud

Fare printer integration and fare amount statistic report everyday automatically to avoid fare fraud.

Fleet Tracking

- Various zone like speed limit zone, driving zone, forbidden zone, departure zone and arrival zone can be set on the client e-map to correct limit driving route.
- **Support:** Google online map, Google offline map, Raster map.

Speed Alert

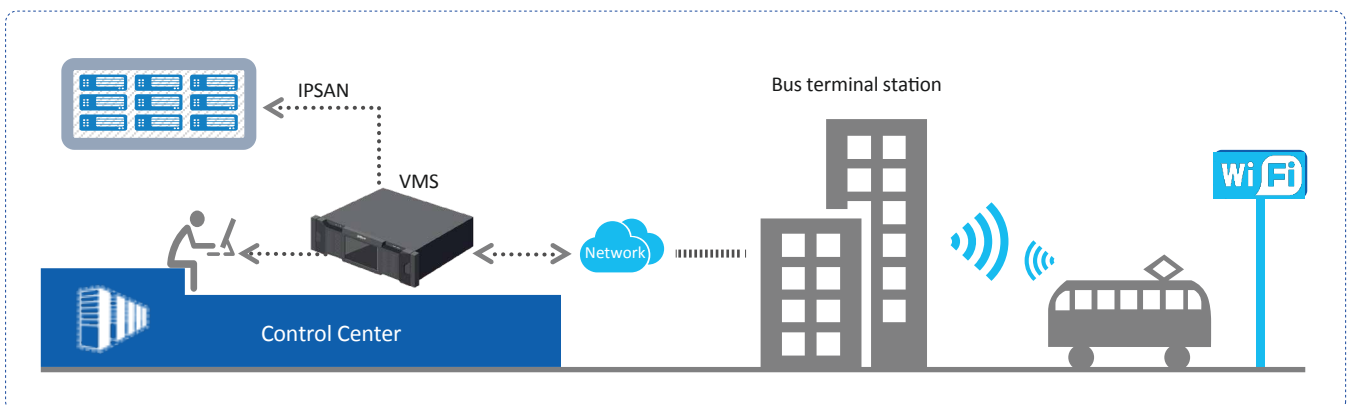

Getting updates and alerts on bus location, direction, speed so that control center can intervene driver immediately with audio talk once abnormal situation happens.

Cost Effective Network Transfer

Automatic Wi-Fi upload

When the vehicles arrive at the terminal station, the mobile NVR can switch from the 3G or 4G network to the Wi-Fi network and backup the data to the control center saving the network traffic cost.

HIGHLIGHTED TECHNOLOGY

Anti-vibration

When the vehicle is running on the road, the onboard shock and vibration are the main causes of HDD damage and video footage loss. Dahua mobile devices comply with **ISO 16750-3** and **EN50155** to protect the system from electrical surge and vibration.

Power-off Protection

- Super-capacitor is applied to achieve smooth switch off in case of sudden system power down thus to avoid data loss and extend the hard disk lifespan.
- It keeps working about **5 sec after power off**.
- Dahua devices have already passed standards **ISO7637-2**.
- Wide voltage input **6-36V**.

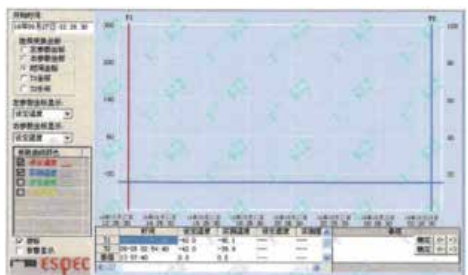

Figure 1: Test waveform

Table 1: Supply overvoltage(Un=24V)

Voltage level min.	Duration d max.	Duration D max.	Series Resistor (Tol. ±10%)
1.4Un	0.1s	1.0s	1 Ω

Temperature Protection

Working temperature: **-30°C (heater optional) ~ +60°C** to cater extreme working conditions inside the vehicle.

Water and Dust Resistant

Dahua offers the cameras corresponding to water and dust resistant, with **IP6K9K-rating**.

G-sensor

Built-in G-sensor inside can help users to detect the vehicle turnover and collision immediately.

Smart Scene Adaptive

unique image processing technology makes the camera to suit different light conditions automatically.

WDR

- The WDR function is extremely useful in vehicle doors and spaces near windows to get clear enough images.
- Up to 120dB Wide Dynamic Range to capture a optimized image quality even in high contrast sunshine environment.
